Article 3	Electronic template of the emissions report
Article 4	Electronic template of document of compliance
Article 5	Entry into force

ANNEX I - Template for monitoring plans

ANNEX II - Template for emissions reports

ANNEX III - Template for documents of compliance

Commission Implementing Regulation (EU) 2016/1927

of 4 November 2016

on templates for monitoring plans, emissions reports and documents of compliance pursuant to Regulation (EU) 2015/757 of the European Parliament and of the Council on monitoring, reporting and verification of carbon dioxide emissions from maritime transport

(Text with EEA relevance)

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Regulation (EU) 2015/757 of the European Parliament and of the Council of 29 April 2015 on the monitoring, reporting and verification of carbon dioxide emissions from maritime transport, and amending Directive 2009/16/EC, and in particular Articles 6(5), 12(2), and 17(5) thereof,

Whereas:

- (1) Articles 6(1) and 6(3) of Regulation (EU) 2015/757 require companies to submit to the verifier a monitoring plan consisting of complete and transparent documentation of the monitoring method to be applied for each ship falling under the scope of that Regulation.
- (2) In order to ensure that those monitoring plans contain standardised information allowing for harmonised implementation of the monitoring and reporting obligations, it is necessary to lay down templates, including technical rules for their uniform application.
- (3) The monitoring plan should contain at least the elements laid down in Article 6(3) of Regulation (EU) 2015/757. It should also use the units for determining 'cargo carried' as specified in Commission Implementing Regulation (EU) 2016/1928. Given the two distinct transport services that ro-pax ships provide, such ships will need to differentiate between fuel consumption and CO₂ emissions data for freight and for passengers. This would allow for a better determination of their average operational energy efficiency indicators.
- (4) Without prejudice to Article 6(3) of Regulation (EU) 2015/757, and in accordance with the last paragraph of Article 10 of that Regulation, the monitoring plan should allow for the monitoring and reporting of fuel consumption and CO₂ emitted on the basis of other voluntary criteria. This would make it possible to better understand the average reported energy efficiency. This concerns in particular differentiated monitoring of fuel consumption for cargo heating and for dynamic positioning as well as differentiated monitoring of laden voyages and when navigating through ice.
- (5) To make it easier to prepare monitoring plans for companies with several ships, it is appropriate to allow companies to indicate which procedures described of the monitoring plan would apply in a relevant manner to all ships under the company's responsibility.
- (6) When providing information on elements and procedures as part of the monitoring plan pursuant to Article 6(3) of Regulation (EU) 2015/757, companies should be able to also refer to procedures or systems effectively implemented as part of their existing management systems, such as the International Safety Management Code (ISM Code), the Ship Energy Efficiency Management Plan (the SEEMP), or to systems and controls covered by harmonised quality, environmental or energy management standards, such as EN ISO 9001:2015, EN ISO 14001:2015 or EN ISO 50001:2011.
- (7) To make monitoring easier, it is appropriate to allow the use of default values for the level of uncertainty associated with fuel monitoring.
- (8) To make the entire compliance cycle (including monitoring, reporting and verification) easier, information on management, in particular on appropriate data management and control activities, should be considered as useful information. A dedicated section in the monitoring template should help companies to structure the necessary management elements.
- (9) It is necessary to lay down specifications for an electronic template for emissions reports. This is needed to ensure that verified emissions reports are submitted electronically and that they contain complete and standardised aggregated annual information, which can be made publicly available and which enables the Commission to prepare the reports required under Article 21 of Regulation (EU) 2015/757.
- (10) The emissions report should cover the minimum content as laid down in Article 11(3) of Regulation (EU) 2015/757, including the results of the annual monitoring. It should also allow for the reporting of additional information that can help understanding of the average operational energy efficiency indicators reported on a voluntary basis. This concerns in particular the elements for voluntary monitoring of fuel consumed and CO₂ emissions emitted, differentiated on the basis of criteria specified in the monitoring plan.
- (11) It is necessary to lay down technical rules establishing an electronic template for documents of compliance. This ensures that standardised, easily processable information can be included in the documents of compliance sent by the verifiers pursuant to their obligation under Article 17(4) of Regulation (EU) 2015/757 to inform without delay the Commission and the authorities of the flag State of the issuance of a document of compliance.
- (12) Thetis MRV, a dedicated Union information system developed and operated by the European Maritime Safety Agency, should be available for companies and accredited verifiers so that they can use it to electronically submit satisfactorily verified emissions reports and related documents of compliance to the Commission and flag States. It should be designed in a flexible way so as to consider the event of a global monitoring, reporting and verification system for greenhouse gas emissions.

- (13) The Commission has consulted parties concerned on best practices on matters addressed by this Regulation. The consultation was carried out through the 'Shipping MRV experts' subgroups' set up under the umbrella of the European Sustainable Shipping Forum.
- (14) The measures provided for in this Regulation are in accordance with the opinion of the Climate Change Committee established by Article 26 of Regulation (EU) No 525/2013 of the European Parliament and of the Council,

HAS ADOPTED THIS REGULATION:

Article 1

Subject matter

This Regulation lays down templates and technical rules for the submission of monitoring plans, emissions reports and documents of compliance pursuant to Regulation (EU) 2015/757.

Article 2

Template of the monitoring plan

- 1. Companies shall draw up the monitoring plan referred to in Article 6 of Regulation (EU) 2015/757 using a template corresponding to the model set out in Annex I.
- 2. Companies may split the monitoring plan into a company-specific part and a ship-specific part, provided that all elements set out in Annex I are covered.

The information contained in the company-specific part, which may include Tables B.2, B.5, D, E and F.1 of Annex I, shall be applicable to each of the ships for which the company is to submit a monitoring plan pursuant to Article 6 of Regulation (EU) 2015/757.

Article 3

Electronic template of the emissions report

- 1. For the purposes of submitting the emissions report pursuant to Article 11(1) of Regulation (EU) 2015/757, companies shall use the electronic version of the template published by the Minister and available on the gov.gi website.
- 2. The electronic version of the template of the emissions report referred to in paragraph 1 shall contain the information set out in Annex II.

Article 4

Electronic template of document of compliance

1. For the purposes of issuing a document of compliance pursuant to Article 17(4) of Regulation (EU) 2015/757, the verifier shall provide relevant data using the electronic version of the template published by the Minister and available on the gov.gi website.

2.	The	electronic	version	of the	template	of t	he	document	of	compliance	referred	to	in	paragraph	1	shall
		the inform								-						

Article 5

Entry into force

This Regulation shall enter into force on the twentieth day following that of its publication in the *Official Journal of the European Union*.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels, 4 November 2016.

ANNEX I

Template for monitoring plans

Part A Revision record sheet

Version No	Reference date	Status at reference date	Reference to Chapters where revisions or modifications have been made, including a brief explanation of changes

Part B Basic data

Table B.1. Identification of the ship	
Name of the ship	
IMO identification number	
Port of registry	
Home port (if not identical with port of registry)	
Name of the shipowner

ANNEX II

Template for emissions reports

Part A Data identifying the ship and the company

- 1. Name of the ship
- 2. IMO identification number

3.

- (a) Port of registry OR
- (b) Home port
- 4. Ship category [drop down menu: 'Passenger ship', 'Ro-ro ship', 'Container ship', 'Oil tanker', 'Chemical tanker', 'LNG carrier', 'Gas carrier', 'Bulk carrier', 'General cargo ship', 'Refrigerated cargo carrier', 'Vehicle carrier', 'Combination carrier', 'Ro-pax ship', 'Container/ro-ro cargo ship', 'Other ship types']
- 5. Ice class of the ship (non-mandatory only if included in the monitoring plan) [drop down menu: Polar Class PC1 PC7, Finnish-Swedish Ice Class IC, IB, IA or IA Super]
- 6. Technical efficiency of the ship
- (a) Energy Efficiency Design Index (EEDI), where required by MARPOL, Annex VI, Chapter 4, Regulations 19 and 20, expressed in grams CO₂/tonne-nautical mile OR
- (b) Estimated Index Value (EIV), calculated in accordance with IMO Resolution MEPC.215 (63), expressed in grams CO₂/tonne-nautical mile
- 7. Name of the shipowner
- 8. Address of the shipowner and its principal place of business: address line 1, address line 2, city, state/province/region, postcode/ZIP, Country
- 9. Name of the company (only if not the shipowner)
- 10. Address of the company (only if not the shipowner) and its principal place of business: address line 1, address line 2, city, state/province/region, postcode/ZIP, Country
- 11. Contact person
- (a) Name: title, first name, surname, job title
- (b) Address: address line 1, address line 2, city, state/province/region, postcode/ZIP, Country
- (c) Telephone
- (d) email

Part B Verification

- 1. Name of the verifier
- 2. Address of the verifier and its principal place of business: address line 1, address line 2, city, state/province/region, postcode/ZIP, Country
- 3. Accreditation number

4. Verifier's statement

Part C Information on the monitoring method used and the related level of uncertainty

- 1. Emission source [drop down menu: 'All sources', 'Main engines', 'Auxiliary engines', 'Gas turbines', 'Boilers', 'Inert gas generators']
- 2. Monitoring method(s) used (per emission source) [drop down menu: 'Method A: BDN and periodic stocktakes of fuel tanks', 'Method B: Bunker fuel tank monitoring on-board', 'Method C: Flow meters for applicable combustion processes', 'Method D: Direct CO₂ emissions measurement']
- 3. Related level of uncertainty, expressed as % (per monitoring method used)

Part D Results from annual monitoring of the parameters in accordance with Article 10

FUEL CONSUMPTION AND CO2 EMITTED

- 1. Amount and emission factor for each type of fuel consumed in total:
- (a) Fuel type [drop down menu: 'Heavy Fuel Oil (HFO)', 'Light Fuel Oil (LFO)', 'Diesel/Gas Oil (MDO/MGO)', 'Liquefied Petroleum Gas (Propane, LPG)', 'Liquefied Petroleum Gas (Butane, LPG)', 'Liquefied Natural Gas (LNG)', 'Methanol', 'Ethanol', 'Other fuel with non-standard emission factor']
- (b) Emission factor, expressed in tonnes CO₂/tonne fuel
- (c) Total fuel consumption, expressed in tonnes fuel
- 2. Total aggregated CO₂ emitted within the scope of this Regulation, expressed in tonnes CO₂
- 3. aggregated CO₂ emissions from all voyages between the port of Gibraltar, expressed in tonnes CO₂
- 4. aggregated CO_2 emissions from all voyages which departed from the port of Gibraltar, expressed in tonnes CO_2
- 5. aggregated CO₂ emissions from all voyages to the port of Gibraltar, expressed in tonnes CO₂
- 6. CO₂ emissions which occurred within the port of Gibraltar at berth, expressed in tonnes CO₂
- 7. Total fuel consumption and total aggregated CO_2 emitted assigned to passenger transport (for ro-pax ships), expressed in tonnes fuel and in tonnes CO_2
- 8. Total fuel consumption and total aggregated CO₂ emitted assigned to freight transport (for ro-pax ships), expressed in tonnes fuel and in tonnes CO₂
- 9. Total fuel consumption and total aggregated CO_2 emitted on laden voyages (voluntary), expressed in tonnes fuel and in tonnes CO_2
- 10. Total fuel consumption for cargo heating (for chemical tankers, voluntary), expressed in tonnes fuel
- 11. Total fuel consumption for dynamic positioning (for oil tankers and 'other ship types', voluntary), expressed in tonnes fuel

DISTANCE TRAVELLED, TIME SPENT AT SEA AND TRANSPORT WORK

- 1. Total distance travelled, expressed in nautical miles
- 2. Total distance travelled when navigating through ice (voluntary), expressed in nautical miles
- 3. Total time spent at sea, expressed in hours
- 4. Total time spent at sea when navigating through ice (voluntary), expressed in hours

- 5. Total transport work, expressed in
 - passenger-nautical miles (for passenger ships)
 - tonne-nautical miles (for ro-ro ships, container ships, oil tankers, chemical tankers, gas carriers, bulk carriers, refrigerated cargo carriers, vehicle carriers, combination carriers)
 - cubic meter-nautical miles, (for LNG carriers, container/ro-ro cargo ships)
 - deadweight-tonne carried-nautical miles (for general cargo ships)
 - passenger-nautical miles AND tonne-nautical miles (for ro-pax ships)
 - tonne-nautical miles OR deadweight-tonne carried-nautical miles (for other ship types)
- 6. Second parameter for total transport work (voluntary), expressed in
 - tonne-nautical miles (for general cargo ships)
 - deadweight-tonne carried-nautical miles (for vehicle carriers)
- 7. Average density of the cargoes transported in the reporting period (for chemical tankers, bulk carriers and combination carriers, voluntary), expressed in tonnes per cubic meter

ENERGY EFFICIENCY

- 1. Average energy efficiency
- (a) Fuel consumption per distance, expressed in kilogram per nautical mile
- (b) Fuel consumption per transport work, expressed in grams per passenger-nautical mile, grams per tonne-nautical mile, grams per cubic meter-nautical mile, grams per deadweight-tonne carried-nautical mile or grams per passenger-nautical mile AND grams per tonne-nautical mile, as applicable to relevant ship category
- (c) CO₂ emissions per distance, expressed in kilograms CO₂ per nautical mile
- (d) CO₂ emissions per transport work, expressed in grams CO₂ per passenger-nautical mile, grams CO₂ per tonne-nautical mile, grams CO₂ per cubic meter-nautical mile, grams CO₂ per deadweight-tonne carried-nautical mile or grams CO₂ per passenger-nautical mile AND grams CO₂ per tonne-nautical mile, as applicable to relevant ship category
- 2. Second parameter for average energy efficiency per transport work (voluntary), expressed in
 - grams per tonne-nautical mile and grams CO₂ per tonne-nautical mile (for general cargo ships)
 - grams per deadweight-tonne carried-nautical mile and grams CO₂ per deadweight-tonne carried-nautical mile (for vehicle carriers)
- 3. Differentiated average energy efficiency (fuel consumption and CO_2 emitted) of laden voyages (voluntary), expressed in
 - kilograms per nautical mile
 - grams per tonne-nautical mile, grams per cubic meter-nautical mile, grams per deadweight-tonne carried-nautical mile or grams per passenger-nautical mile, as applicable to relevant ship category
 - kilograms CO₂ per nautical mile
 - grams CO₂ per tonne-nautical mile, grams CO₂ per cubic meter-nautical mile, grams CO₂ per deadweight-tonne carried-nautical mile or grams CO₂ per passenger-nautical mile, as applicable to relevant ship category
- 4. Additional information to facilitate the understanding of the reported average operational energy efficiency indicators of the ship (voluntary)

ANNEX III

This is to certify that the ship 'NAME' emissions report covering the reporting period 'YEAR N-1' has been considered as satisfactory regarding the requirements of Regulation (EU) 2015/757.

This document of compliance has been issued on 'DAY/MONTH/YEAR N'

This document of compliance is linked to emissions report No. 'NUMBER' and is valid until 30 JUNE 'YEAR N + 1'

I) Ship particulars

- 1. Name of the ship
- 2. IMO identification number

3.

- (a) Port of registry OR
- (b) Home port
- 4. Ship category [drop down menu: 'Passenger ship', 'Ro-ro ship', 'Container ship', 'Oil tanker', 'Chemical tanker', 'LNG carrier', 'Gas carrier', 'Bulk carrier', 'General cargo ship', 'Refrigerated cargo carrier', 'Vehicle carrier', 'Combination carrier', 'Ro-pax ship', 'Container/ro-ro cargo ship', 'Other ship types']
- 5. Flag State/Registry
- 6. Gross tonnage

II) Ship owner details

- 1. Name of the shipowner
- 2. Address of the shipowner and its principal place of business: address line 1, address line 2, city, state/province/region, postcode/ZIP, Country

III) Details of company fulfilling the obligations under Regulation (EU) 2015/757 (voluntary field)

- 1. Name of the company
- 2. Address of the company and its principal place of business: address line 1, address line 2, city, state/province/region, postcode/ZIP, Country

IV) Verifier

- 1.Accreditation number
- 2. Name of the verifier
- 3.Address of the company and its principal place of business: address line 1, address line 2, city, state/province/region, postcode/ZIP, Country
