

SCHEDULE 3
FACTOR FOR GEOGRAPHICAL DIVERSIFICATION OF PREMIUM AND
RESERVE RISK

Article 116

1. Subject to paragraphs 5, 6 and 7, for all segments set out in article 147A and Schedule 2, an insurance or reinsurance undertaking must calculate the factor for geographical diversification of a particular segment s referred to in Articles 116 and 147 in accordance with the following formula—

$$\text{DIV}_s = \frac{\sum_r (V_{(\text{prem},r,s)} + V_{(\text{res},r,s)})^2}{(\sum_r (V_{(\text{prem},r,s)} + V_{(\text{res},r,s)}))^2}$$

Where—

- (a) each of the sums cover all the geographical regions set out in paragraph 8;
 - (b) $V(\text{prem},r,s)$ denotes the volume measure for premium risk of the segment s and the region r ; and
 - (c) $V(\text{res},r,s)$ denotes volume measure for reserve risk of the segment s and the region r .
2. For all segments set out in article 147A and Schedule 2 and all geographical regions set out in paragraph 8, an insurance or reinsurance undertaking must calculate the volume measure for premium risk of a particular segment s and a particular region r in the same way as the volume measure for non-life or NSLT health premium risk of the segment s as referred to in Articles 116 and 147, but taking into account only insurance and reinsurance obligations where the underlying risk is situated in the region r .
 3. For all segments set out in article 147A and Schedule 2 and all geographical regions set out in paragraph 8, an insurance or reinsurance undertaking must calculate the volume measure for reserve risk of a particular segment s and a particular region r in the same way as the volume measure for non-life or NSLT health reserve risk of the segment s as referred to in Articles 116 and 147, but taking into account only insurance and reinsurance obligations where the underlying risk is situated in the region r .
 4. For the purpose of the calculations set out in paragraphs 2 and 3, the following criteria apply—
 - (a) in the case of non-life insurance, the region in which a risk is situated is—

- (i) if the insurance relates to a building or to a building and its contents (so far as the contents are covered by the same policy), to the region in which the building is situated;
 - (ii) if the insurance relates to a vehicle of any type, to the region of registration;
 - (iii) in the case of policies of a duration of four months or less covering travel or holiday risks (whatever the class concerned), to the region in which the policyholder took out the policy; or
 - (iv) in a case not covered by paragraphs (i) to (iii)–
 - (aa) if the policyholder is an individual, to the region in which the individual has their habitual residence at the date when the contract of insurance is entered into; and
 - (bb) otherwise, to the region in which the establishment of the policyholder to which the policy relates is situated and that date; and
- (b) in the case of life insurance, the region of the commitment, in relation to a commitment entered into at any date, is–
- (i) if the policyholder is an individual, the region in which the individual had their habitual residence at that date; or
 - (ii) if the policyholder is not an individual, the region in which the establishment of the policyholder to which the commitment relates was situated at that date; where for these purposes “commitment” means a commitment represented by contracts of insurance of a prescribed class.

5. Despite paragraph 1, the factor for geographical diversification must be equal to 1 for segments 6, 10, 11 and 12 set out in schedule 2 and for segment 4 set out in article 147A.

6. Despite paragraph 1, the factor for geographical diversification for a segment set out in Annex II must be equal to 1 if an insurance or reinsurance undertaking uses an undertaking-specific parameter for the standard deviation for non-life premium risk or non-life reserve risk of the segment to calculate the non-life premium and reserve risk sub-module.

7. Despite paragraph 1, the factor for geographical diversification for a segment set out in article 147A must be equal to 1 if an insurance or reinsurance undertaking uses an undertaking-specific parameter for the standard deviation for NSLT health premium risk or NSLT health reserve risk of the segment to calculate the NSLT health premium and reserve risk sub-module.

GEOGRAPHICAL DIVISION OF REGIONS IN SCHEDULES 5 TO 8 INTO RISK ZONES

Article 121

Risk zones.

The risk zones of regions set out in Schedules 5 to 8 as referred to in Schedules 10 to 13 must be equal to the postal code areas or administrative units in the following tables.

Mappings of risk zones for regions with only one risk zone.

The regions LU, MT, Guadeloupe, Martinique, St Martin and Reunion must consist of only one zone. Mappings of risk zones for the regions with only one risk zone which are part of another region The regions Principality of Andorra, Principality of Lichtenstein, Principality of Monaco, Republic of San Marino and Vatican City State must consist of only one zone each. The zones must be mapped to the following regions—

Principality of Andorra	zone 9 of the region FR
Principality of Lichtenstein	zone 19 of the region CH
Principality of Monaco	zone 06 of the region FR
Republic of San Marino	zone 47 of the region IT
Vatican City State	zone 00 of the region IT

Mappings of risk zones for regions where the zonation is based on postal codes

For the purpose of this Schedule, the following must apply—

- (a) The mapping of risk zones for the regions AT, CZ, CH, DE, HE, IT, NL, NO, PL, PT, ES and SK must be based on the first 2 digits of the postal code;
- (b) The mapping of risk zones for the regions BE and CY must be based on the first digit of the postal code;
- (c) The mapping of risk zones for IE must be based on the first 2 letters of the postal code;
- (d) The mapping of risk zones for UK must be based on the first 2 letters of the postal code where the risk is located, with the exception of postal codes which have a digit in the second position. The risks in those postal codes postal codes which have a digit in the second position must be mapped to zones identified by a 1-letter code.
